

CURRICULUM LINKS

Science

- Life and living things
 - animals have life cycles→ view animals in all stages of development
 - learn about the needs of living things, and factors that both help and hinder their survival
 - see how living things, including plant and animals, depend on each other and the environment to survive
 - learn about predator-prey relationships
 - learn about animals' relationships with their habitats and how habitats can be protected
 - view behaviour and eating habits
- Endangered species
 - human impact on species→ how humans can help and hinder the species, through deforestation, hunting, etc.
 - other factors which impact upon the survival of a species (Eg. Cats killing and injuring birds) and how these can be reduced (Eg. Keeping cats indoors at night, putting bells on them).

SOSE

- Interactions between people and places affect the physical features of the land, biodiversity, water and atmosphere
- Sustainability of local natural, social and built environments can be influenced by positive and negative attitudes and behaviours
